

SMART INDIA HACKATHON 2024

- Problem Statement ID – 1715
- Problem Statement Title - AI tool/mobile app for Indian Sign language(ISL) generator from audio-visual content in English/Hindi to ISL content and vice-versa
- Theme- Miscellaneous
- PS Category- Software
- Team Name - Pookie Army

Our Solution

An AI integrated mobile app/ website to convert speech into ISL and vice versa

What makes us Unique

Computer vision integrated model for accurate sign detection

Website + app for diverse use cases

Reinforcement learning to constantly reduce errors

Current problems

Lack of interpreters

Overdependence on interpreters

No check mechanism

What do we improve?

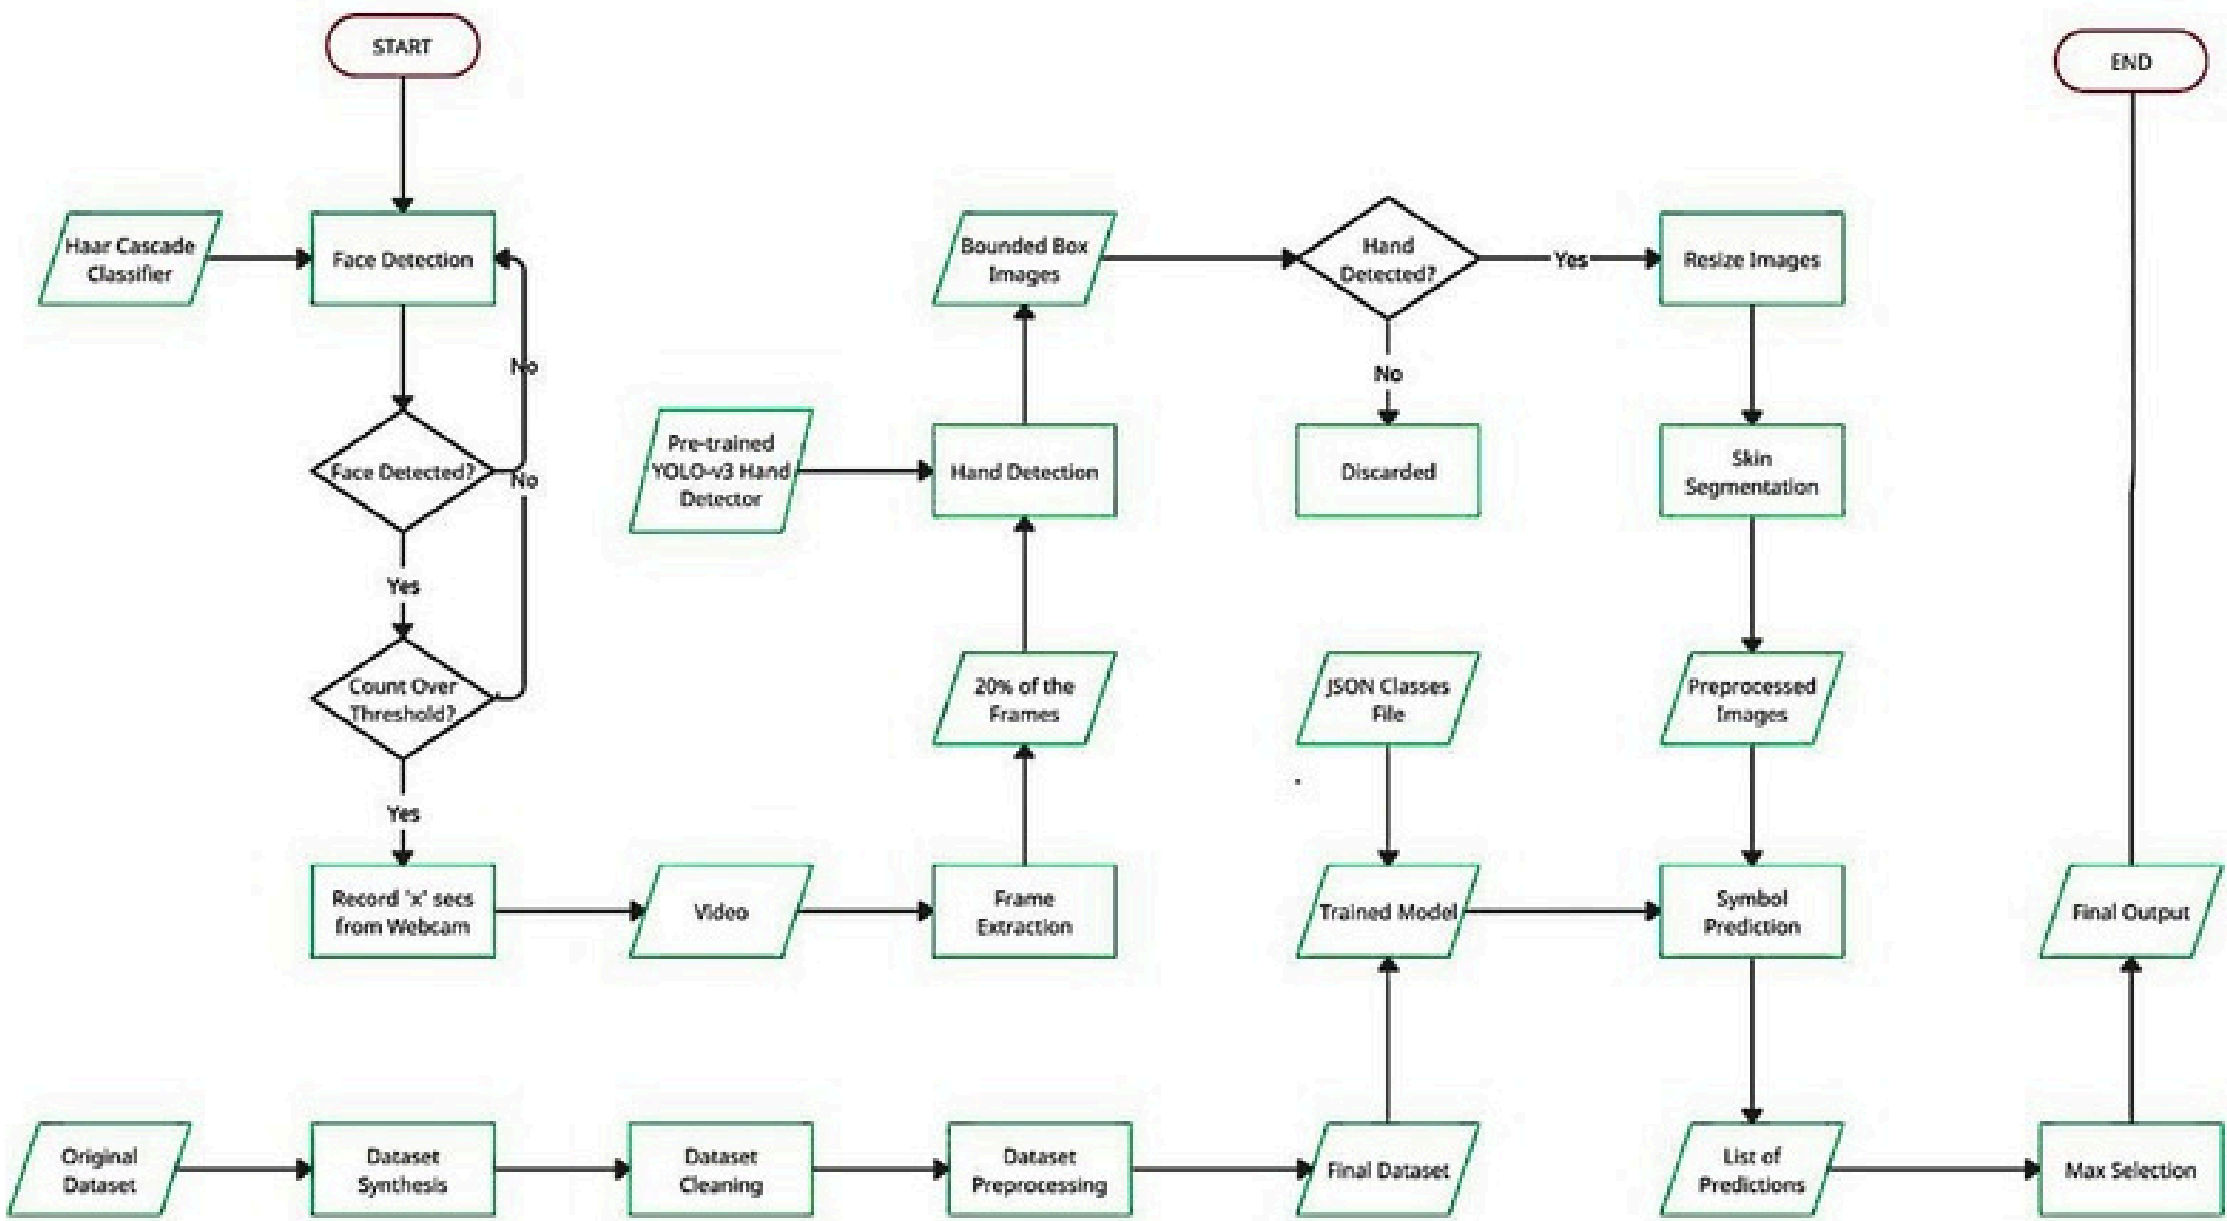

Easy access

Promotes independence

Constantly improving

Frontend language:
Javascript
Framework
React Next.js for optimized rendering, React Native
Tech Stack
MERN Stack
Backend
Node framework for managing the requestes and responses.
For data analysis and response generation
Python OpenCV Module.

CLICK HERE

Post request sent to the server

API call to Sign language mode

Input Processing

Output sent back

Respond back to the client side

Feasibility

- No logistics required 
- Accessible anytime and anywhere 
- Free of cost 
- Gives privacy, as no human translator 

The driving forces

- 63 Million Indians suffer from auditory impairment 
- Only 388 Schools and no colleges specifically for deaf people 
- 1 Billion internet users with 10-15% annual increase 
- Awareness among people to uplift the Divyaang 

Easy-to-use User Interface

Challenges

- Accuracy of model 
- Lack of awareness 
- No access to smart phones 
- Local language speakers 

Combating these challenges

- Keep training model with updated datasets 
- Making it a pre-installed application on smartphones 
- Government can distribute smartphones for free 
- Gradually increase number of available languages 

Impact

- More Employment Opportunities
- Revolutionisation of education sector

- Easy communication during medical emergency
- Empowerment and independence

Social

Economical

- **Reduced Isolation:** Participation in community activities, fostering better integration into society.

- **Increased Accessibility:** Information and services

- **Improved lifestyle and their condition**

Environmental

- **Efficient Resource Utilization**

- **Lower Carbon Footprint:** Due to digital communication

- **Increased Workforce Participation**

- **Market Expansion**

- **Reduced Dependence on Human Interpreters**
